Amendment

Dear Sir:

Applicant respectfully requests that this amendment be entered in the record for the above captioned matter pursuant to the Office Action mailed April 4, 2005 and the Notice of Non-Compliance dated July 20, 2005. The prior communications was a bona fide attempt to comply.

This is a re-submission of the corrected selections for compliance.

Claims 1-19 are pending in this application. Claims 1-19 have been rejected.

Remarks

This amendment is in response to the Office Action mailed April 4, 2005 and is being entered in the record for the above captioned matter.

Claims 1-19 are pending in this application. Claims 1-19 have been rejected. Claims 3, 4, and 8 have herein been amended.

In the Drawing:

The drawings are objected to under 37 CFR 1.83(a) for failure to show every feature of the claim, specifically, failure to show the structure enabling the reservoir to be removable as recited in claims 3, 4, and 8.

Page 18, line 16-18 of the Specification states that, "The agent mixing chamber 324 or 324a is preferably removable and replaceable from the dechlorination device, and may be removed without removing the dechlorination device from the fluid flow path." Claims 3, 4, and 8 have been amended to comply with this paragraph of the specification, that is, the agent mixing chamber is removable and replaceable.

In compliance with 37CFR 1.121(d) drawing sheets have been corrected to show the structure enabling the agent mixing chamber to be removable as recited in amended claims 3, 4, and 8. Therefore, Replacement Sheets containing Figures 1 and 4 are enclosed showing the structure, particularly the access cap, enabling the agent mixing chamber to be removable as recited in claims 3, 4, and 8. As such, the Examiner's objection is respectfully requested to be withdrawn.
